Applicant's election without traverse of Group I, claims 1-18, in the paper received 10/15/2003 is acknowledged. The reference not considered on the IDS was not found in the file and is not readily available to the examiner. Please update the priority claims in the specification and confirm this application is a National Stage filed under 371. Priority is claimed to 2/2/1998 and the priority documents have been received.

Claims 7-18 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claims 7-18 depend from other multiply dependent claims or are dependent claims that depend from multiply dependent claims that depend from other multiply dependent claims. See MPEP § 608.01(n). Accordingly, the claims 7-18 are not been further treated on the merits.

Claims 1-6 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Each of the following applies in all occurrences.

In claim 1(b)(ii) ~~such as~~ is improper and it is unclear as to the significance of how the components are described as necessary. In claim 1(d) the coagulation is monitored in (c) but detected in (d). Further, the rate of a normal patient would not be equivalent if the sample patient were not normal. In claim 2

levels may be intended to be concentration. In claim 4 used in step (a) lacks antecedent basis because no use is seen. In claim 5 the venom is derived but in claim 4 the venom is whole which would not be derived.

5

The title of the invention is not aptly descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

10

This application does not contain an abstract of the disclosure as required by 37 CFR 1.72(b). An abstract on a separate sheet is required.

15

The following prior art pertinent to applicant's disclosure is made of record and not relied upon:
